About

Abstraction was inspired by the beauty of the human body and a passion for wine and interior design.

Elisabeth, with her knowledge of anatomy, and Sandra, with her design background, combined their talents to create Winey. The goal was to develop a product that is not only practical but also aesthetically pleasing and playful. Thus, Winey was born: a 3-in-1 beverage container, vase, and snack holder that unites functionality and fun in a unique design.

The Vision

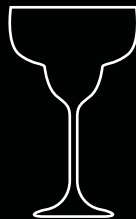

Winey is just the beginning

The designs follow a common design language and philosophy.

Other innovative design products are already in development.

Look forward to innovative creations that combine humor and functionality.
